PROFESSIONAL SUMMARY

Analytics architect with 14+ years building measurement infrastructure from scratch, specialising in the gap between instrumentation and human behaviour. Expert in GA4, GTM (client- and server-side), BigQuery, Amplitude (11 certifications, both Expert credentials), and Adobe Analytics. dbt Fundamentals certified (April 2026); BigQuery/GCP project in active development. Amsterdam-based, EU work authorisation, available immediately. MSc Data Analytics, WGU. Portfolio: fredericlabadie.com

CORE SKILLS

Analytics platforms	GA4 (certified) · Adobe Analytics Business Practitioner · Amplitude (11 certs, both Experts) · GTM client- & server-side · Adobe Launch · Mixpanel (vendor evaluation)
Data engineering	BigQuery (advanced, 8+ yrs daily) · SQL (advanced) · Python (pandas, scipy) · dbt Fundamentals · Snowflake (working knowledge) · Databricks Fundamentals · GitHub
BI & dashboarding	Looker Studio (advanced) · SSRS (advanced) · Tableau (working knowledge) · Power BI (developing) · BigQuery-native dashboarding
MarTech / CDP	Bloomreach CDP · Oracle Responsys · OneTrust (3 organisations) · Marketing automation analytics
Research methodology	Sense-Making Methodology (Dervin) — focus groups, UX question design, user testing · A/B test design & statistical evaluation · Hotjar · SurveyMonkey
Governance	GDPR & CCPA compliant data collection · OneTrust consent architecture · data quality monitoring

WORK EXPERIENCE

Analytics Architect <i>Telus Digital — Multi-client enterprise consultancy • Remote</i> • Lead end-to-end analytics implementation engagements: measurement planning, SDR creation, GTM deployment (client- and server-side), QA, and reporting infrastructure. • Built and operated an AI-assisted alert triage system for client product telemetry. V1 compressed 230 raw Amplitude alerts to 39 findings (83% reduction) while preserving human-judgement gates. Surfaced one critical feature failure missed in human-only review. • Automated 12+ hours per week of manual reporting per client through SQL pipeline development; built standardised Looker Studio and BigQuery dashboards aligned to client KPI frameworks. • Lead A/B testing programmes end-to-end: success criteria, guardrails, sample sizing, statistical analysis, and stakeholder-ready synthesis.	2024 – Present
Email & SMS Marketing Manager <i>A Major Retail Client — Consumer electronics • Remote contract (concurrent with Telus)</i> • Led full migration from Oracle Responsys to Bloomreach CDP — redesigned customer data model, event schemas, segmentation logic, and marketing data flows with zero campaign downtime. • Designed lifecycle event tracking architecture supporting triggered campaign automation. +10.8% YoY CTR, +5.8% YoY open rate in the first year on the new platform. • Designed and executed A/B tests across lifecycle campaign touchpoints; implemented data-driven optimisations based on statistical analysis.	2023 – 2025
Analytics Architect / BI Developer <i>Stanley Steemer Inc. — National franchise service, 280 locations • Dublin, OH</i> • Built the entire marketing analytics and BI layer from scratch for an organisation with mature operations data but no marketing measurement capability. • Designed data architecture on Azure SQL Server with Python ingestion for Universal Analytics and a server-side bridge from GA4 → BigQuery back into Azure; established the KPI framework giving leadership its first reliable cross-location performance view.	2018 – 2023

- Introduced the single-customer concept and householding data model, enabling identity resolution across 280 locations and unlocking marketing automation for the first time.
- Led GA4 beta implementation: measurement plan, SDR, data layer spec, GTM, full QA against production data before migration from Universal Analytics.
- Applied Sense-Making Methodology (Dervin) in user-testing sessions combined with Hotjar and SurveyMonkey; findings fed directly into tracking specifications and UX recommendations.

Web Analyst

2015 – 2018

Designory / TBWA Worldwide — Global advertising agency • Long Beach, CA

- Led GTM migrations and tracking architecture upgrades for clients including Subaru of America, Securitas, and Booz Allen Hamilton; wrote data layer specifications and deployed custom JavaScript tracking (video, form abandonment, cross-domain journeys).
- Applied Sense-Making Methodology (Dervin) in UX question design and user testing; implemented OneTrust at agency level for GDPR-compliant consent management.
- Grew subscriber base from 20,000 to 50,000 through data-driven acquisition funnel analysis (Melody Health brand, Planned Parenthood, 2011–2015).

EDUCATION

Master of Science, Data Analytics — 2020-2023

Western Governors University

Bachelor of Arts, Strategic Communications — 2006-2011

The Ohio State University • Minors: Professional Writing, Philosophy

CERTIFICATIONS

- Amplitude Expert: Analysis — May 2026 | ID: 4d904c1e-9887-4c29-953f-d11de234565c
- Amplitude Expert: Data Management — May 2026
- Amplitude Specialist: Experiment, Marketing Analytics, Data Cleanup — Mar 2026
- Amplitude Practitioner: Retention, Acquisition, Monetization — Mar 2026
- Amplitude Foundations: Analytics, Experiment, Data Management — Mar 2026
- dbt Fundamentals — dbt Labs, Apr 2026 | ID: 178745166
- Adobe Analytics Business Practitioner — Adobe, Nov 2024
- Google Analytics Certification — Google (expires Aug 2026)
- Conversion Optimisation Certification — Google, Aug 2025
- Databricks Fundamentals — Feb 2026 | ID: 173794440
- Prompt Design in Vertex AI — Google Cloud, Feb 2026
- Sense-Making Methodology (Dervin) — The Ohio State University, Mar 2011
