

Frederic Labadie

SENIOR DATA ANALYST · ANALYTICS ARCHITECT

Amsterdam, Netherlands EU work authorisation MSc Data Analytics +31 6 13 82 86 35

frederic.labadie@gmail.com linkedin.com/in/frederic-labadie fredericlabadie.com

PROFILE

Senior data analyst and analytics architect with 14+ years building measurement infrastructure from scratch. Specialist in the gap between **instrumentation** and **human behaviour** — designing the tracking that surfaces what users can't or won't tell you directly, and the frameworks that translate it into decisions. Eleven Amplitude certifications across every tier, including both Expert credentials (Analysis and Data Management); dbt Fundamentals certified April 2026.

SKILLS

ANALYTICS GA4 (certified) · Adobe Analytics (Business Practitioner) · Amplitude (11 certs incl. both Experts) · GTM client- & server-side · Adobe Launch · Mixpanel (vendor evaluation)

BI Looker Studio (advanced) · SSRS (advanced) · Tableau · Power BI (developing) · BigQuery-native dashboarding

RESEARCH Sense-Making Methodology (Dervin) — focus groups, UX question design, user testing · A/B test design & statistical evaluation · Hotjar · SurveyMonkey

DATA ENG. BigQuery (advanced) · SQL (advanced, daily) · Python (pandas, numpy, scipy) · dbt Fundamentals · Snowflake · Databricks Fundamentals · GitHub · Data Mesh Architecture

MARTECH / CDP Bloomreach CDP (Foundations, SMS, Jinja, Engagement) · Oracle Responsys · OneTrust (3 orgs) · Marketing automation analytics

AI IN ANALYTICS Claude API · LLM-assisted SQL, documentation, anomaly detection · Prompt Design in Vertex AI (certified) · AI workflow design with human-judgement gates

Analytics Architect · Telus Digital

2024 – 2026

100% remote · multi-client enterprise consultancy · clients in consumer electronics, B2B SaaS, e-commerce, travel · available immediately, no notice period

- Led end-to-end analytics implementation engagements: measurement planning, SDR creation, GTM deployment (client- and server-side), QA, and reporting infrastructure.
- Built and operated an **AI-assisted alert triage system** for client product telemetry. V1 ran in production 13–26 April 2026, compressing **230 raw Amplitude alerts to 39 AI-posted findings (83% reduction)** while preserving human-judgement gates (surface, suppress, escalate when warranted, never silence a worsening issue). **Surfaced one critical feature failure the on-call team had missed in human-only review** — a signal that would have continued silently otherwise.
- Automated 12+ hours per week of manual reporting per client through SQL pipeline development; built standardised Looker Studio and BigQuery dashboards aligned to client KPI frameworks.
- Led A/B testing programmes end-to-end: success criteria, guardrails, sample sizing, statistical analysis, and stakeholder-ready synthesis.

Email & SMS Marketing Manager · A Major Retail Client

2023 – 2025

Remote contract (concurrent with Telus Digital) · consumer electronics retail

- Led the full **migration from Oracle Responsys to Bloomreach CDP** — redesigned customer data model, event schemas, segmentation logic, and marketing data flows with **zero campaign downtime** and GDPR-compliant consent throughout.
- Designed lifecycle event tracking architecture and customer identity data model supporting triggered campaign automation. **+10.8% YoY CTR, +5.8% YoY open rate** in the first year on the new platform.
- Designed and executed A/B tests across lifecycle campaign touchpoints; analysed results and implemented data-driven optimisations.

Analytics Architect / BI Developer · Stanley Steemer Inc.

2018 – 2023

National franchise service, 280 locations · Dublin, OH

Walked into an organisation with mature operations data but no marketing measurement capability. Built the entire marketing analytics and BI layer from scratch.

- Designed the data architecture on Azure SQL Server (SSMS for development, SSRS for reporting — even on GA4 data); built a Python ingestion layer for Universal Analytics and later a server-side bridge from the GA4 → BigQuery export back into Azure; established the KPI framework that gave leadership its first reliable view of performance across 280 locations.
- Introduced the **single-customer concept and householding data model**, enabling accurate identity resolution across the multi-location estate and unlocking marketing automation and CRM strategy for the first time.
- Led GA4 beta implementation — measurement plan, SDR, data layer spec, GTM, and full QA against production data before migration from Universal Analytics.
- Applied **Sense-Making Methodology (Dervin)** in user-testing sessions; combined with Hotjar and SurveyMonkey to build triangulated user-needs evidence that fed directly into tracking specifications and UX recommendations.

Digital Business Analyst · Xivic, Inc.

2018 – 2019

Digital agency · Los Angeles, CA

- End-to-end analytics tracking for SPA client products: data layer specs, GTM configuration with custom JavaScript, Enhanced Ecommerce, and SDR-driven QA.
- Built cross-domain tracking, custom dimension mapping, and conversion event schemas; troubleshooted using browser dev tools and Omnibug. Implemented OneTrust.

Web Analyst · Designory / TBWA Worldwide

2015 – 2018

Global advertising agency · Long Beach, CA · clients include Subaru of America, Securitas, Booz Allen Hamilton

- Led GTM migrations and analytics tracking architecture upgrades; wrote data layer specifications and deployed custom tag implementations across multiple client digital estates.
- Developed custom JavaScript tracking for complex interaction events including video, form abandonment, and cross-domain journeys.
- Applied **Sense-Making Methodology (Dervin)** in UX question design and user testing for brand clients. Implemented OneTrust at agency level for GDPR-compliant consent management.

National nonprofit · Santa Ana, CA · Melody Health was a new brand launched within Planned Parenthood

- Built analytics and BI reporting infrastructure from scratch for the brand launch; defined KPIs and reporting cadences.
- Grew digital subscriber base from 20,000 to 50,000 through data-driven acquisition funnel analysis and channel-performance optimisation.

EDUCATION

MSc, Data Analytics · Western Governors University	2020 — 2023
Credential ID: 24D401C0FTE6	
BA, Strategic Communications · The Ohio State University	2006 — 2011
Minors: Professional Writing, Philosophy
