Amsterdam, Netherlands • EU Work Authorization • Available Immediately

PROFESSIONAL SUMMARY

UX telemetry specialist and digital analytics practitioner with 14+ years of experience driving end-to-end tracking implementation — from defining UX telemetry questions and creating tracking plans through event implementation, dashboard development, and insight generation with product and UX teams. Deep expertise in GA4, Adobe Analytics, Amplitude, and GTM (client and server-side), with a structured methodology for translating user behaviour questions into implementable data requirements. Practitioner of Sense-Making Methodology (Dervin) applied explicitly in UX research, user testing, and focus group contexts across three organisations. Background in healthcare communications at Planned Parenthood, with direct experience of health-adjacent digital audiences and health equity values. Amsterdam-based, available immediately. MSc in Data Analytics.

CORE SKILLS

UX Telemetry & Tracking: Tracking plan / SDR creation (end-to-end), event taxonomy design, event and parameter definition, gtag fundamentals, data layer architecture, custom JavaScript tracking, SPA tracking, UTM governance, attribution model design, tag QA and validation (ObservePoint, Omnibug, Charles Proxy)

Analytics Platforms: Google Analytics 4 (certified, advanced), Adobe Analytics (Business Practitioner certified), Amplitude (11 certifications: both Expert tracks — Analysis and Data Management; Specialist — Marketing Analytics, Experiment, Data Cleanup; Practitioner — Retention, Acquisition, Monetization; Foundations), Mixpanel (evaluation), GTM client-side & server-side, Adobe Launch

UX Research & Usability: Sense-Making Methodology / Dervin (applied explicitly: focus group facilitation at Planned Parenthood, UX question design at Designory/TBWA, user testing at Stanley Steemer), Hotjar (Designory/TBWA, Stanley Steemer), SurveyMonkey, survey design, qualitative research

Workshop Facilitation: Outcomes workshops with business, product, and engineering stakeholders, requirements translation into data specifications, UX telemetry scoping and planning, stakeholder alignment across technical and non-technical audiences

Dashboarding & Insight: Looker Studio (advanced), SSRS (advanced), BigQuery, SQL, Python, data storytelling for executive and product audiences, driving evidence-based culture adoption

Privacy & Compliance: OneTrust implementation (3 organisations), GDPR-compliant data collection, CCPA compliance, consent management integration into delivery planning

WORK EXPERIENCE

Analytics Architect / UX Telemetry Lead

2024 – Present

Telus Digital — Digital Product Consultancy — Remote

- Drive end-to-end UX telemetry projects for enterprise clients: facilitate workshops with product, design, and engineering stakeholders to define telemetry questions and objectives; translate UX questions into concrete event definitions, data needs, and tracking plans usable by both business and technical teams.
- Coordinate implementation activities across product managers, engineers, and architects to ensure tracking plans are delivered in practice — writing data layer specifications, configuring GTM (client and server-side) with custom JavaScript, and QA-ing all implementations against SDRs.
- Build dashboards and analytics assets that support insight generation, helping product teams understand user behaviour, task completion patterns, and experience friction across web and mobile products.
- Present telemetry findings to both technical and non-technical stakeholders, translating complex behavioural data into clear, actionable product recommendations.
- Support data storytelling and cultural transition toward evidence-based product management within client organisations; drive adoption through training and documentation.
- Evaluate and implement analytics tooling including GA4, Adobe Analytics, Amplitude, and Mixpanel; design event schemas tailored to each product's measurement needs. Ensure GDPR-compliant data collection and consent management throughout.

Analytics Architect / BI Developer

2018 – 2023

Stanley Steemer Inc. — National Franchise Service — 280 locations

- Applied Sense-Making Methodology (Dervin) explicitly in user testing sessions to surface unarticulated user needs and translate findings into tracking specifications and UX improvement recommendations — combining structured qualitative methodology with Hotjar behavioural data and SurveyMonkey surveys for a triangulated view of user experience.
- Led end-to-end UX telemetry implementation for GA4: facilitated requirements workshops, wrote the measurement plan and tracking specification, coordinated engineering implementation, defined and executed QA testing, and trained stakeholders on adoption.
- Built a culture of evidence-based product and marketing decisions from scratch with leadership that had previously operated on intuition — driving adoption through regular insight review sessions, clear data storytelling, and persistent stakeholder engagement.
- Implemented OneTrust consent management platform for GDPR and CCPA compliance across the full digital estate, integrating privacy requirements into delivery planning.

Web Analyst — UX & Digital Analytics

2015 – 2018

Designory / TBWA Worldwide — Digital Agency — Long Beach CA (Clients: Subaru primary, Audi partial)

- Applied Sense-Making Methodology explicitly in UX question design for user testing sessions, working alongside a UX engineer to develop structured research questions that surfaced unarticulated user needs and informed tracking priorities and product recommendations for premium brand clients.
- Conducted UX testing and behavioural analysis using Hotjar alongside Sense-Making-informed research questions; translated findings into tracking specifications and client recommendations.
- Led GTM implementations, data layer architecture, and SDR creation for multiple client digital estates; ran A/B tests across acquisition funnels.

Digital Business Analyst

2018 – 2019

Xivic, Inc. — Digital Agency — Los Angeles CA

- Implemented end-to-end analytics tracking for SPA products: wrote tracking specifications, configured GTM with custom JavaScript, implemented Enhanced Ecommerce, and QA'd all implementations against SDRs.

Digital Communication Specialist

2011 – 2015

Melody Health / Planned Parenthood — National Nonprofit — Santa Ana CA

- Applied Sense-Making Methodology in focus group facilitation for the Melody Health brand launch — designing research questions that surfaced how a health-adjacent audience sought, used, and made sense of health information, directly informing content strategy and digital product design.
- Worked directly with health-adjacent digital audiences, developing an understanding of health communication sensitivities, health equity values, and the particular care required when designing digital experiences for users navigating personal health decisions.
- Built analytics and reporting infrastructure from scratch; grew subscriber base from 20,000 to 50,000 through data-informed decisions across email, social, and web channels.

EDUCATION

Master of Science, Data Analytics

2020 – 2023

Western Governors University

Data Science Continuing Education Certificate

2018

University of California, Irvine

Bachelor of Arts, Strategic Communications

2006 – 2011

The Ohio State University — Minors: Professional Writing, Philosophy

CERTIFICATIONS

- Amplitude Expert — Analysis (May 2026) • Amplitude Expert — Data Management (May 2026) • Amplitude Certified — Specialist: Marketing Analytics, Experiment, Data Cleanup; Practitioner: Retention, Acquisition, Monetization; Foundations: Analytics, Experiment, Data Management (March 2026)
- Adobe Analytics Business Practitioner — Adobe (Nov 2024, expires Nov 2028)
- Google Analytics Certification — Google (expires Aug 2026) • Conversion Optimization — Google (Aug 2025)
- dbt Fundamentals — dbt Labs (April 2026) • Databricks Fundamentals — Databricks (Feb 2026)
- Prompt Design in Vertex AI — Google Cloud (Feb 2026) • Decision Science Fundamentals — LinkedIn (Aug 2025)
- Sense-Making Methodology (Dervin) — OSU (2011) — Applied: focus groups (Planned Parenthood), UX question design (Designory/TBWA), user testing (Stanley Steemer)
- Foundations of Neuroscience — Johns Hopkins University (April 2026)

- Anthropic AI — 14 credentials (May 2026) • Technical: Claude 101, Claude Code 101, Building with Claude API, Claude Code in Action, Intro to MCP, MCP Advanced Topics, Intro to Subagents, Intro to Agent Skills, AI Capabilities & Limitations • AI Fluency: AI Fluency Framework & Foundations, Teaching the AI Fluency Framework, AI Fluency for Educators, Small Businesses, Nonprofits

LANGUAGES

English: Native • French: A2 spoken / B1 written • Dutch: A2 (actively improving)
